1 Overview

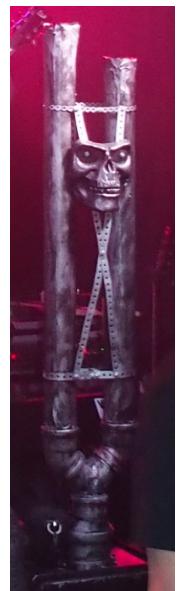

Ideally, we like to use one monitor per band member (4 at the front of the stage, 1 on drums). The monitors for vocals and drums are the most important.

Stage FX

For stage effects, we have 2 "Smoke Towers", which each contain a small fog machine and LEDs. Ideally, they should be positioned left & right of the drumkit. On smaller stages, we can put them wherever there is enough space. One power outlet each is needed for these "Smoke Towers".

The band triggers the fog machines using a foot pedal on-stage.

2 Lineup and Equipment

Important: We have all equipment marked as *optional* but cannot bring everything for logistical reasons. Bands and event organizers should agree on who provides what. Equipment **not** marked as *optional* is not meant for sharing without previous discussion.

Vocals: Patrick Tschackert

📞 +49 176 2162 6551

✉️ ptschack@gmail.com

Equipment

- Shure Super 55 Deluxe
- own mic stand with lights & strobes

Needs

- power outlet for mic stand
-

Guitar / Backing Vocals: Dirk Sabath

📞 +49 177 5463559

✉️ dirk.sabath@gmx.de
